

Round Concepts is very proud to announce our latest addition to our Eli "Big" Wheel collection. This 1918 original #12 Eli Wheel. It last saw service gingerly turning away over the bright lights of Las Vegas atop the Boardwalk Casino. Unfortunately, the only riders for the last 29 years were mannequins. Even still, not a bad life for either the wheel or its riders. Big city progress brings change and when it was announced that the Boardwalk would be torn down, we were more than happy to take this classic under our wing for what we hope will be a detailed restoration. When complete, it should look similar to the #5 in the top right picture but with its original wooded buggy style seats. We can't wait to see her put smiles on real riders faces.
